Installation Guide

Git Repository

<https://gitlab.gbar.dtu.dk/s174271/dtu-pay.git>

To build, deploy and test the project run

`./build_and_run.sh`

Scripts

- `./build.sh`
Packages and installs all modules in the maven local repository. This also runs tests for each microservice.
- `./deploy.sh`
Deploys all microservices to docker, given that they have already been packaged.
- `./test.sh`
Runs end to end test.
- `./build_and_run.sh`
Does all of the above.

Tools required for installation

- Java 11 SDK ([Link here](#))
- Maven
- Docker
- Docker-compose
- Bash

Software tools used for development

Tool	Version
IntelliJ	2021.3.1
Maven	4.0.0
JUnit	4 and 5
Cucumber	7.0.0
Quarkus	2.2.0
